A [0033] FIG. 2 illustrates a process which may begin with a step of dispensing an item at step 16 from one of the decentralized storage locations 12-1 to a patient. A dispensing operation may occur in a variety of ways. In a medical facility, dispenses may be completed from medication orders or they may be completed from inventory lists, to name a few types of dispensing operations. Assuming a medication has been dispensed from decentralized storage location 12-1, the medication may either be administered to a patient or returned as shown by step 18. Medications may be returned for a variety of reasons such as the patient has checked
